

HOW TO TRANSFER YOUR RULE THE WAVES 2 GAME TO ANOTHER PC

Notes:

- A) "Computer A" is the computer/PC you currently have the RTW2 game installed on, while "Computer B" is the computer/PC that you wish to transfer the game to.
- B) Your RTW2 game **must** already have been activated on Computer A in order to transfer the license!
- C) You can transfer the RTW2 license onto a new machine as often as you need. If you requested a second license for another PC (*i.e. for having the game available on both a home PC and on a laptop, etc*) then you can transfer each license as often as needed. **Note that the same Serial Number is used for transferring your license or for installing the license on two machines.**

1. Install the RTW2 game onto Computer B. Launch/start the game on Computer B. The Activation dialog box will be shown.
2. Launch/start the game on Computer A. The Activation dialog box will be shown.
3. Check the "Transfer license" radio button on Computer A.
4. Enter the activation code for Computer A into the "Activation Code" box on Computer A. (*This is the activation code that was used to originally activate Computer A, which would have been sent to you in an email from NWS*)
5. Enter the Site code from Computer B into the "New site code" box on Computer A.
6. Press the "Continue" button.
7. Press **OK** to approve the license transfer process. **THIS STEP WILL DEACTIVATE YOUR LICENSE ON COMPUTER A!**
8. A new dialog box will pop-up at this point with an activation code. Enter this Activation code into the "Activation Code" box on Computer B, and enter your RWT2 Serial Number into the "Serial number" box on Computer B to activate the license on Computer B. (*You may need to check the "Unlock application" box first on Computer B if it is not checked.*)

Rule The Waves 2 'COMPUTER A' ACTIVATION SCREEN
